TWINLOCK

SW STAHL WORLD NEWS!

With our unique TWINLOCK system, you have the choice and can configure your workshop trolley to best suit you and your work!

THE TWINLOCK SYSTEM ALLOWS YOU TO OPEN EITHER ONE DRAWER OR ALL DRAWERS AT ONCE.

The changeover can be locked with a separate key.

YOU HAVE THE CHOICE!

THIS IS HOW
IT WORKS

TT801 TT802

THE TROLLEY
EXTERIOR

YOUR CUSTOMIZED DRAWERS

EXTRA WIDE AND STURDY DRAWER SLIDES.

Our drawers run on extra wide 53 mm slides and have a high load capacity with a high safety reserve. The slides are only loaded to approx. 50% of their maximum load and therefore have less wear and a long service life. At 50 kg load we guarantee at least 25,000 openings.

COMFORT IS BIG.

The automatic retraction of the drawers closes them damped and silently. Even if the trolley moves, the drawer remains closed - no additional locking mechanism is required.

TT801 **TT802**

THE TROLLEY EXTERIOR

THIS HOLDS 80 kg

BIG MOUTH WITH A LOT OF POWER.

Since our „Strong One“ is equipped with 2 pairs of drawer slides, it can handle up to 80 kg of WEIGHT! This makes the bottom drawer perfect for heavy tools. Thanks to the drawer height there is also enough space available.

TT 801 TT 802

THE TROLLEY EXTERIOR

SIMPLY SEALED

YOUR TOOLS STAY DRY.

The seal between the stainless steel and the plastic side covers means that no liquid enters the carriage. Oil-smearred or oil-dripping parts can be deposited on the stainless steel cover.

THE
PERFECT
GRIP!

HIGH PERFORMANCE FOR YOUR WORK.

We have rethought the wheels and the brakes. The design of the wheels has been redesigned and the geometry of the brakes completely revised. A discreet color ring in the wheels underlines the modern design. The wheels with TPE treads ensure smooth and quiet running and the perfect grip.

THIS WALL CAN DO MORE!

WORKING WITH SYSTEM - THE WAY YOU NEED IT.

The perforated side panel is ideal for attaching a wide range of various accessories. In this way, you can customize your workshop trolley exactly to your needs.

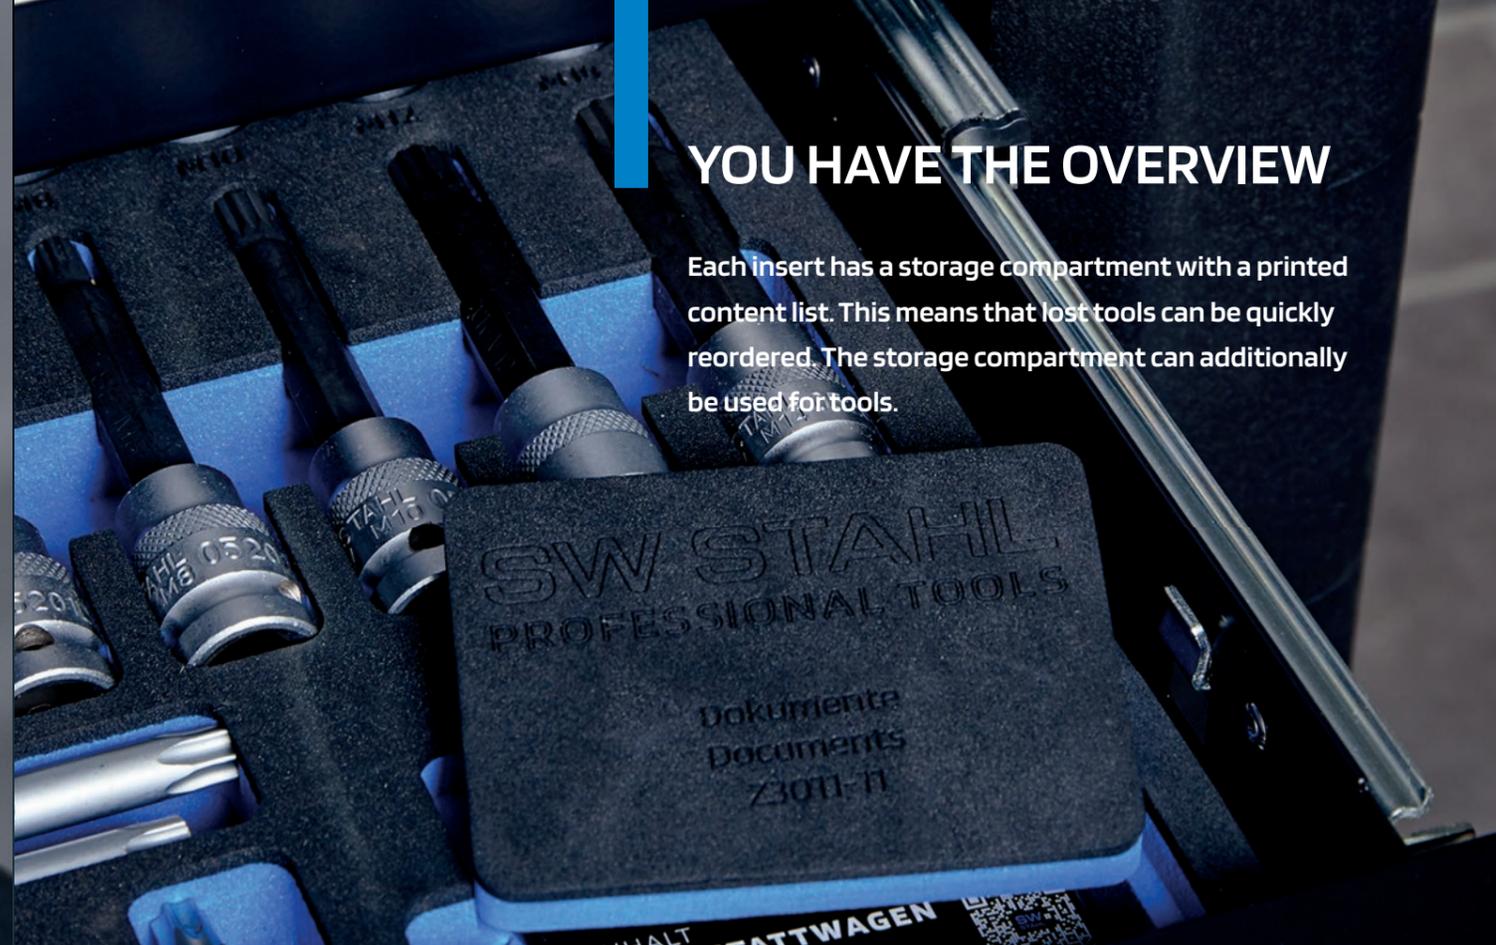

TT801 TT802

MAGNETIC

The magnetic storage compartments in the plastic covers keep the contents in place even when the trolley is moving.

YOU HAVE THE OVERVIEW

Each insert has a storage compartment with a printed content list. This means that lost tools can be quickly reordered. The storage compartment can additionally be used for tools.

SEARCHING IS OVER

The key will no longer get lost! Every workshop trolley receives our SW STAHL keychain.

WELL TUCKED

So that the key is not misplaced when working, there is a key compartment in the bottom drawer.
